

JCC Selected as Owner's Project Manager for the Addition and Renovation to Coe Brown Northwood Academy

Jobin Construction Consultants was selected by Coe Brown Northwood Academy to provide Owner Construction Representative services during the Smith Hall classroom addition and renovation project.

The project included constructing a second floor classroom addition above an existing 1 story space. Work included removal of the existing roof structure in order to install new floor and roof structure for the proposed second floor. The project included expansion of the building's main entrance and lobby area with a new connector hallway. Work on the project was completed while maintaining use of the attached gymnasium and other academic spaces.
