

## **Manchester Community Health Center Retains JCC for Renovation to Child Health Services**

Jobin Construction Consultants was retained by the Manchester Community Health Center to serve as project manager for a renovation to Child Health Services in Manchester.

The project was funded by a federal grant earmarked for the enhancement of our community health systems. The renovation was completed in multiple phases to allow the majority of the facility to remain in operation during construction.

The project added much needed clinical space as well as enhancing the programs in dental and mental health fields.
